

OttoE Series

Industrial Unmanaged 8-port Fast/Gigabit Ethernet Switch

Overview

EtherWAN's OttoE Series is an Industrial unmanaged Fast Ethernet and Gigabit Ethernet switching platform, designed for easy deployment in harsh environments with limited space. The OttoE Series is an economic easy-to-use device, which provides essential industrial Ethernet networking functionality.

The OttoE hardened series has obtained the standard certifications, and the performance and quality conform to EN 50121-4, UL 61010, CE, FCC etc. The device supports redundant power input, and provides relay alarm in case of power failure. This versatile switch features full/half-duplex auto-negotiation and auto MDI/MDIX operation, allowing for convenient connection of a variety of network devices. QoS (Quality of Service) support allows for traffic prioritization and effective management of resources.

OttoE is equipped with eight Fast/Gigabit Ethernet ports, or a combination of Fast/Gigabit Ethernet copper ports and two 100 or 100/1000 Mbps dual rate SFP ports for long distance connectivity. A rugged, fan-less, DIN rail mountable metal housing provides security and easy installation (mounting kit is included).
